Reissue Application - DETAILED ACTION

Acknowledgements

The Examiner acknowledges the reply filed 11/14/2009 in which 1-12, 14-27, 34-39, 48-50, and 53-60 are pending for examination in this application.

Response to Claim Amendments

The amendment filed 11/14/14/2009 (as well as the 1/17/02, 6/17/03, 12/15/03, and 3/14/2008) proposes amendments to reissue application that do not comply with 37 CFR 1.173(b), which sets forth the manner of making amendments in reissue applications. A supplemental paper correctly amending the reissue application is required.

Amendments in a reissue application must be made relative to the original patented claims. Therefore all underlining and bracketing should always be relative to the original claims.

A shortened statutory period for reply to this letter is set to expire ONE (1)

MONTH or THIRTY (30) DAYS, whichever is longer, from the mailing date of this letter.

Objection to the Consent

This application is objected to under 37 CFR 1.172(a) as the assignee has not established its ownership interest in the patent for which reissue is being requested. An assignee must establish its ownership interest in order to support the consent to a reissue application required by 37 CFR 1.172(a). The assignee's ownership interest is established by:

Page 3

Application/Control Number: 10/052,528

Art Unit: 3763

 (a) filing in the reissue application evidence of a chain of title from the original owner to the assignee, or

(b) specifying in the record of the reissue application where such evidence is recorded in the Office (e.g., reel and frame number, etc.).

The submission with respect to (a) and (b) to establish ownership must be signed by a party authorized to act on behalf of the assignee. See MPEP § 1410.01.

An appropriate paper satisfying the requirements of 37 CFR 3.73b must be submitted in reply to this Office action. The Examiner also notes the consent filed 3/14/2008 in and of itself in acceptable, however it was never accompanied by a proper statement establishing ownership.

Defective Error Statement, Rejections under 35 U.S.C 251

The Examiner asserts that the error statement in the oath/declaration regarding the additional apparatus claims which seem to be drawn to a subcombination (page 2, references an additional attached sheet, <u>not found</u> as filed in the 03/14/2008) is insufficient and does not identify a correctable error under 35 U.S.C. 251. The Applicant needs to <u>specifically identify at least one error</u> (with specific reference to the claim number and claim scope element) and specifically state <u>how it renders the original patent wholly or partly invalid</u>. Therefore the reissue oath/declaration filed with this application is defective because it fails to identify <u>at least one error</u> which is relied upon to support the reissue application. See 37 CFR 1.175(a)(1) and MPEP § 1414.

Art Unit: 3763

In accordance with 37 CFR 1.175(b)(1), a supplemental reissue oath/declaration under 37 CFR 1.175(b)(1) must be received before this reissue application can be allowed. Therefore, claims 1-12, 14-27, 34-39, 48-50, and 53-60 are rejected as being based upon a defective reissue under 35 U.S.C. 251. See 37 CFR 1.175. The nature of the defect is set forth above. Receipt of an appropriate supplemental oath/declaration under 37 CFR 1.175(b)(1) will overcome this rejection under 35 U.S.C. 251. See MPEP § 1414.01.

Additionally, Claims 1-12, 14-27, 34-39, 48-50, and 53-60 are rejected under 35 U.S.C. 251 as being improperly broadened in a reissue application made and sworn to by the assignee and not the patentee. A claim is broader in scope than the original claims if it contains within its scope any conceivable product or process which would have infringed the original patent. A claim is broadened if it is broader in any one respect even though it may be narrower in other respects.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 34-39 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The Examiner asserts that the means for

Art Unit: 3763

language (i.e. "means for rotating") was not present in the originally patented claims and lacks basis in the original specification. The Examiner asserts that this claim scope recitation is new matter in this reissue application, (i.e. Applicant's specification should specifically recite the structure associated with the means plus function language).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CHRISTOPHER D. KOHARSKI whose telephone number is (571)272-7230. The examiner can normally be reached on 5:30am to 2:00pm EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nick Lucchesi can be reached on 571-272-4977. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
